SAFE | ADVANCED | ACCELERATED

***EXPERIENCE ALUFLASH, A VIBRATION-FREE
TOOL FOR ALUMINUM MACHINING CAPABLE OF
ACHIEVING ADVANCED MILLING APPLICATIONS
AT ACCELERATED RPMs.***

SAFE | ADVANCED | ACCELERATED

**RUN STEEPER RAMPING ANGLES
TO SHORTEN CYCLE TIME**

In this application, ALUFLASH™ was used to machine closed pockets.

In this application, the ALUFLASH™ dove to the bottom of the pocket faster than any other conventional tool, reducing the cycle time while keeping the same Vc and fz. Additionally, its great chip evacuation capability enabled the tool to take a larger radial DOC, dramatically increasing the MRR.

	Competitor	HANITA™
End Mill		ALUFLASH
Diameter	12mm (.472")	12mm (.472")
# flute	3	3
Grade		UNCOATED
Vc	650m/min (1950 sfm)	650m/min (1950 sfm)
rpm	17242 rev/min	17242 rev/min
fz	0,12mm/z (.0047 ipt)	0,12mm/z (.0047 ipt)

ap	24mm (.944")	24mm (.944")
ae	6mm (.236")	8mm (.314")
Ramping Angle	5°	30°

ALUFLASH™

*High-Performance Solid End Milling
for Aluminum*

Materials

N

Applications

Slotting

Side Milling/
Shoulder Milling

Ramping

Helical
Interpolation

Plunge Milling

Trochoidal Milling

Drilling

UNCOATED

2- and 3-flute solid carbide end mill.
Diameter Range: 1mm–20mm (1/8-1")

Built-in features to enable accelerated aluminum machining.

Balanced by design
to guarantee limited vibration and a low spindle load at very high RPMs.

“W” flute shape
for improved chip formation and evacuation, increasing process security.

Parabolic core
for increased tool stability and reduced deflection and risk of breakage.

Double/Triple rake gashing
for improved chip evacuation and higher ramping capabilities and Z-axis machining.

SOLID END MILLING

ALUFLASH • CATALOG NUMBERING SYSTEM

Each character in our catalog number signifies a specific trait of that product.
Use the following key columns and corresponding images to easily identify which attributes apply.

WIDIA

Find your Local Hanita™ and WIDIA™ Authorised Distributor

Hanita brand solid end milling solutions are available through WIDIA authorised distributor partners. Our distributors know us, and more importantly, they know you. They know better than anyone in the industry how to put the global power of WIDIA to work for you — in your industry, in your region, and for your business.

DISTRIBUTORS

Find your Local Authorised Distributor by accessing our distributor finder at widia.com.

IMPORTANT SAFETY INSTRUCTIONS: READ BEFORE USING THE TOOLS IN THIS CATALOGUE

METALCUTTING SAFETY

Projectile and Fragmentation Hazards

Modern metalcutting operations involve high spindle and cutter speeds and high temperatures and cutting forces. Hot metal chips may fly off the workpiece during metalcutting. Although cutting tools are designed and manufactured to withstand high cutting forces and temperatures, they can sometimes fragment, particularly if they are subjected to over-stress, severe impact, or other abuse.

To avoid injury:

- Always wear appropriate personal protective equipment, including safety goggles, when operating metalcutting machines or working nearby.
- Always make sure all machine guards are in place.

For more information, read the applicable Material Safety Data Sheet provided by WIDIA and consult General Industry Safety and Health Regulations, Part 1910, Title 29 of the Code of Federal Regulations.

These safety instructions are general guidelines. Many variables affect machining operations. It is impossible to cover every specific situation. The technical information included in this catalogue and recommendations on machining practices may not apply to your particular operation.

For more information, consult the WIDIA Metalcutting Safety booklet, available free from WIDIA at +1 724 539 5747 or fax +1 724 539 5439. For specific product safety and environmental questions, contact our Corporate Environmental Health and Safety Office at +1 724 539 5066 or fax +1 724 539 5372.

Breathing and Skin Contact Hazards

Grinding carbide or other advanced cutting tool materials produces dust or mist containing metallic particles. Breathing this dust or mist — especially over an extended period — can cause temporary or permanent lung disease or make existing medical conditions worse. Contact with this dust or mist can irritate eyes, skin, and mucous membranes and may make existing skin conditions worse.

To avoid injury:

- Always wear breathing protection and safety goggles when grinding.
- Provide ventilation control and collect and properly dispose of dust, mist, or sludge from grinding.
- Avoid skin contact with dust or mist.
